PROFESSIONAL SUMMARY

Experienced Full-Stack Developer and Product Manager, specializing in the design and development of scalable, secure, and responsive systems. Strong background in UI/UX and graphic design, product architecture, and end-to-end application delivery. Adept at solving complex technical challenges and leveraging AI-driven automation to enhance system performance, reliability, and optimization.

COMPETENCE AND CAPABILITIES

- Technology Strategy, Design & Development • Engineering Team Leadership & Agile Delivery
- Full-Stack Architecture (React, Next.js, Node.js, PostgreSQL) • Cloud & DevOps Transformation (AWS, Docker, CI/CD)
- AI Workflow Automation & Process Optimization • Product Lifecycle Management (Discovery → MVP → Scale)
- Cross-Functional Stakeholder Alignment • UI/UX Design & Digital Experience Strategy.

PROFESSIONAL EXPERIENCE

De Steward Group

Product Manager | Tech Lead

2020 – 2023

- Directed end-to-end product development for web and mobile applications from ideation to deployment.
- Led cross-functional teams of developers, designers, and stakeholders to deliver scalable digital platforms.
- Defined and executed product roadmaps aligned with business and user objectives.
- Oversaw system architecture decisions ensuring scalability, maintainability, and performance.
- Improved workflow efficiency through structured sprint planning and agile implementation.

Smartforce Solutions

Graphic Design & DevOps Manager | Technical Operations Lead

2023 – 2025

- Design, Architected and deployed scalable web applications using modern cloud infrastructure.
- Implemented CI/CD pipelines to streamline release cycles and reduce deployment friction.
- Led DevOps practices improving application stability and release consistency.
- Managed digital branding, UI/UX systems, and enterprise product deployment strategy.
- Coordinated technical execution across product, engineering, and operations teams.

SELECTED STRATEGIC PROJECTS

RealConnect Platform (Web & Mobile)

Scalable real estate platform featuring real-time search architecture and structured backend system.

PayRide Mobility App (2021–2023)

Ride-matching platform built with scalable architecture supporting operational efficiency.

GovTech Procurement System (2025)

Enterprise procurement workflow solution designed for structured digital governance.

WorldMap Web Application (2024 MVP)

Frontend-driven MVP built for scalable product expansion.

EDUCATION & PROFESSIONAL DEVELOPMENT

Bachelor of Art in Industrial Design – Ahmadu Bello University

Diploma, Computer Science- Hassan Usman Katsina Polytechnic

Diploma, Full-Stack Development – Klevrtech Skillboat (India)

Certified Scrum Product Manager (CSPM)

Google UX Design Certificate.

TECHNOLOGY STACK

Frontend: React, Next.js, TypeScript, Tailwind CSS

Backend: Node.js, Postgre, SQL, DevOps: AWS, Docker, CI/CD

Methodologies: Agile, Scrum, Product-Led Growth

Creatives: Figma, Canva, CorelDraw, Capcut, Photoshop and Premier pro
